• Brooklyn, NY • <https://github.com/OpenBitSack>

Summary

Jiawei is a multilingual software engineer with 8 years of experience, specializing in full-stack development using JavaScript, Typescript and Python.

He's recognized for developing scalable solutions and has successfully led a pre-seed startup to secure funding.

He also gained valuable experience working at startups, launching new projects from scratch.

He is a problem solver with a can-do attitude, always ready to develop new solutions and offer another perspective.

Additionally, he has a strong interest in AI and Blockchain.

Experience

Boom — <https://www.boompay.app>

Austin, TX

Senior Full Stack Engineer

04/2025 - 09/2025

Real estate technology company providing flexible, rewarding payment options and other solutions for renters

- Developed the Boom Screen (Manufactured Housing Operator) using React and MUI for the front-end
- Optimized performance using lazy loading, memorization, and code splitting for React applications
- Synchronized community, site, and applicant data between platforms in real-time using Ruby
- Integrated third-party API (Cleara) to review screen reports and verifications(IDV, Criminal Report, Housing History)
- Architected and maintained a comprehensive RSpec test suite for back-end services, leveraging factory_bot, Faker, and RSpec mocks to ensure test environments

Jupiter Health — <https://jupiterplans.com>

New York, NY

Founding Full Stack Engineer

11/2024 - 03/2025

The first comprehensive national provider network to directly connect patients and providers

- Implement the MVP using React 18 and Tailwind CSS, establishing a scalable component architecture and design system
- Utilized useQuery hook to efficiently fetch, cache, and update data, improving UI responsiveness and reducing redundant network requests
- Implemented a chatbot for the healthcare platform to help users locate medical services in their area without involving insurance
- Integrated Algolia to power high-performance, full-text service search with optimized indexing strategies and seamless UX
- Refactored the blog page to integrate Sanity.io as the headless CMS

GoodRx — <https://www.goodrx.com>

Santa Monica, CA

Senior Full Stack Engineer

09/2022 - 09/2024

Provide services that helps users find discounts and compare prices for prescription medications

- Upgraded React from version 17, and refactored and optimized the code
- Worked on backend systems using Django for a support services company, developing features to provide real-time prescription medication prices, helping users find discounts and compare prices
- Migrated from Redux-based state management system to NextJS SSR functions & React Context API
- Integrated the API fetching the best-priced medications from multiple pharmacies using AI to enhance accuracy, predict price trends, and provide personalized recommendations
- Established a comprehensive CI/CD pipeline by integrating GitHub with AWS, automating the deployment process to ensure reliable updates

Abridge — <https://www.abridge.com>

Pittsburgh, PA

Senior Full-Stack Engineer

02/2020 - 08/2022

Provide Generative AI for Clinical Conversations

- Developed code primarily in TypeScript, made architectural decisions, recommended technologies to adopt, and ensured Abridge's systems scaled reliably and securely
- Redeveloped the front end using Vue2, and refactored the code for improved performance and maintainability
- Integrated AI APIs such as transforming clinical conversations into comprehensive documentation
- Containerized the project using Docker and Kubernetes, automated the workflow using Jenkins

Experience

Panorama Education — <https://www.panoramaed.com>
Senior Full-Stack Engineer

Boston, MA
07/2018 - 01/2020

Help students achieve academic success and well-being

- Redeveloped a comprehensive survey application using React, allowing students to participate in surveys and derive the scoring system and peer benchmarks
- Implemented an advanced algorithm that accurately filters tens of active surveys from a pool of millions, streamlining the process and improving educational outcomes
- Integrated third-party survey APIs, including the SurveySparrow API
- Followed Agile and Scrum methodologies for software development to shorten development times and maximize collaboration and efficiency

Skills

Language: Typescript · Javascript · Python · Ruby

Framework: ReactJS · Django · FastAPI · NextJS · Angular · VueJS · NodeJS · Ruby on Rails

Database: MySQL · PostgreSQL · MongoDB

CI/CD: Amazon Web Service · Jenkins · Microsoft Azure · Docker · Kubernetes · GCP

Test Tools/Frameworks: Cypress · Pytest · Jest · Enzyme · Mocha · Rspec

Education

Brooklyn College
Bachelor's Degree in Computer Science

Brooklyn, NY
2014 - 2018

SOFT SKILLS

✔ Working hard & Passionate

✔ Avid & Open Communicator

✔ Creative & Innovative
